Brief Description of Arguments to be Presented:

The Office appears to conflate the checking of the signed pre-boot modules with the execution of the hashing modules in Trostle (US 5,919,257), and it is not clear how Trostle can be considered to do either of these operations after invocation of a target program (either pre-boot module or executable program resident on the workstation). See Trostle at FIGs. 4-6 and corresponding description. In addition, consideration of the previously presented arguments regarding claims 2-6 is respectfully requested.

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
